Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Todd Snyder on 07/14/2009 and 07/15/2009.

The application has been amended as follows:

Claim 26 - A device for presenting an electronic program guide comprising:

a memory for storing a set of electronic program guide data including a plurality of program titles and a plurality of organizational categories, where each program title belongs to at least one organizational category;

a display for presenting the electronic program guide; wherein the electronic program guide comprises:

a first spatial arrangement of program titles in a three-dimensional format where one organization level of the electronic program guide spatially groups program titles which belong to the same organizational category in a three-dimensional space and spatially separates program titles which do not belong to the same organizational category in a different three-dimensional space; and

a second spatial arrangement of program titles in two-dimensional space within the three dimensional space, wherein a second organizational level of the electronic program guide spatially groups program titles which belong to the same organizational category in the same two dimensional plane, and spatially separates program titles which do not belong to the same organizational category in a different two-dimensional plane.

Restriction

Claims 25, 27-54 and 79 are directed to patentably distinct species as disclosed in FIG.12B than from FIG.12A. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these

Art Unit: 2426

species are not obvious variants of each other based on the current record. Therefore, Claims 25, 27-54 and 79 are restricted.

Claims 25, 27-54 and 79 are cancelled in response to the restriction mentioned above.

Reason for Allowance

2. Claims 1-24, 26 and 55-78 are allowed.

The current invention teaches a device for displaying an electronic program guide on a screen. The electronic program guide is organized based on the levels of categories in such a way that program titles which belong to the same organizational categories are spatially closely grouped together under the same categories while program titles which do not belong to the same organizational categories are spatially separated and grouped together under a different categories where they belong. The organizational categories provide a first-level organization which defines overall content of the display and a second-level organization which defines the spatial separation of the program titles, where the organizational categories are used at any organizational level.

The closest prior art of Rowe (US 5,623,613) teaches an electronic program guide organized in a way such that the first column containing first level of categories and the second column containing a second level of categories and the third column displaying the corresponding program titles when one of the second level of categories is selected. The prior art of Knowles et al (US 2005/0251822) teaches displaying a column of categories on the screen when Themes tab is selected from a menu. The corresponding program titles are displayed when one of the categories is selected.

The closest prior arts of Rowe and Knowles single or in combination, does not teach the combinational features of "the electronic program guide data are organized and displayed specifically based on the levels of categories such that first level categories defining overall content of display while second level of categories defining spatial separation of the program titles where the organization categories are used at any level; such that program titles belonging to the

Art Unit: 2426

same categories are spatially adjacent and program titles not belonging to the same categories are spatially separated". Therefore, this invention is allowable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Correspondence Information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRED PENG whose telephone number is (571)270-1147. The examiner can normally be reached on Monday-Friday 09:30-19:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hirl can be reached on (571) 272-3685. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
